

THE SUSTAINABLE NEIGHBOURHOODS PROGRAM

The council chambers at Pickering City Hall played host to the Celebrating Sustainable Neighbourhoods program where one of ten participating groups was awarded the opportunity to work with the city on a community enhancement project valued up to \$10,000. Each group presented an overview of their 2014 program activities and then casted one vote for their most deserving competitor, awarding them the title of Best Group Effort. The award-winning Celebrating Sustainable Neighbourhood program challenged neighbourhood groups to complete activities that make Pickering a better place environmentally, socially, or economically.
